Introduction to PRINCE2® is intended to give the participant insight into project work and its associated terminology. This course will give everyone involved with projects a basic understanding of how the concept of PRINCE2 can be used and how to work with the project method. Additionally, focus will be on how to motivate the organization to get started with using PRINCE2.

Target Group
The course is aimed at organizations or individual employees who wish to gain insight into the PRINCE2 method.

Objectives
After completion the participant should:
- Understand how the PRINCE2 method is composed.
- Have knowledge of how PRINCE2 is used.
- Have an understanding of how to work in a PRINCE2 environment.

Content
The course covers the following topics:
- Definition of a PRINCE2 project.
- Why choose PRINCE2.
- Why projects failed.
- What is takes to manage projects.
- PRINCE2 elements, principles, themes, processes, and project environment.
- PRINCE2 in the company.
- PRINCE2 internationally.
- Getting started with PRINCE2

Accomplishment
The course is completed as classroom training with ½ a day duration
